

Full Stack Developer *Austin, TX*

PreFix Inc. is transforming home maintenance and eliminating the hassle of home ownership. We have created a completely new category based on relationships that are woven into the fabric of the communities we serve. Our customer retention and satisfaction are unrivaled by any company in this sector. While currently focused on home maintenance, we are expanding into adjacent services and new geographic markets.

The company is a graduate of the Capital Factory and Techstars Accelerator programs. Current investors include Chicago Ventures, Brand Foundry Ventures, Moonshots Capital, Firebrand Ventures and the UBER Syndicate.

In addition to empowering homeowners to spend time on the things that matter, a core part of our mission is to empower employees to build careers that matter. We are committed to creating clear and compelling career paths for employees at all levels of our organization. Our culture is fast-paced but highly collaborative. We pursue excellence with humility and empathy.

About the Role

As a Full Stack Developer, you will have the opportunity to create innovative web applications and interfaces that will delight our customers, team members and partners as part of an entirely new way of managing your home. You will be working with our back end developers to continue to build out the systems that support these applications as well as new data- and IoT-related products and services.

You will be helping solve one of the biggest consumer problems that exists. This role requires an entrepreneurial, challenge-seeking problem solver that is comfortable with new and rapidly evolving requirements. This requires creativity, an analytical mindset and grit. The role provides significant equity compensation in line with its importance.

What you will do:

- Drive the continued rapid development of our IT platform spanning front and back end.
- Deliver code and interfaces that adapt to a diverse group of stakeholders – not only consumers, but internal support specialists, field service team members, and industry partners.
- Move as quickly as possible to meet deadlines without compromising attention to detail or the quality of our service.
- Continue to build on an already strong technology foundation through rapid but robust and well-documented code that can be used by a growing team of developers in the future.
- Use industry best practice to ensure a minimum of technology debt as the company scales rapidly.
- Work with product leaders to help prioritize ideas based on their business impact and relative difficulty.

What you will need:

- 3+ years-experience in building web applications and back end systems for consumer-facing services or products.
- Fluency in key technologies/methodologies:
 - Javascript
 - React
 - Node JS
 - Python/Django
 - Selenium
 - Continuous integration.
- A teamwork mindset – the ability to work closely with other team members to make sure that user requirements are fully understood and that deliverables fully satisfy them.
- Proven to be self-motivated and eager to take ownership of tasks through to rapid resolution.
- Excellent organization and time management skills.
- Clear communication skills. The ability to communicate concepts simply to make sure that team members (both technical and non-technical) understand.
- The ability to work mostly on site in our offices just south of downtown Austin (we offer free parking.)
- A valid state driver's license and pass pre-employment background check.

Interested candidates should forward a resume and brief cover letter to human.resources@prefixinc.com. For more information about the company please refer to www.prefixinc.com.
